The session will be a series of 4 presentations from each company, followed by Q+A.</p> <p>To give the session a bit of excitement, we'll be asking the audience to vote of which company they would hypothetically like to invest in, and then reveal the results to conclude the session.</p>

12.30 Lunch

13:30 Presentation: Impact fundraising over the past year

- Who are the biggest funds and allocators in impact investing?
- What are the most significant trends in allocation to impact investing?
- Which strategies and themes are gaining the most capital?

13.45 **Plenary #5: Debate: Impact delivers market rate returns**

This is an Oxford-style debate in which we'll have two speakers for the proposition and two speakers against, with audience voting on their views at the start and at the end of the session. This session will be an off-the-record discussion.

The substance of the debate is whether impact funds can deliver market rate returns – a questions that still seems to plague the market. This is a question that goes to the heart of what impact investing means to LPs and to the funds that label themselves as such. In the debate we'll explore questions including: what is market rate exactly, whether the claim of always being able to deliver market rate returns is disingenuous, and if impact funds can deliver the exact same returns as a mainstream PE funds, what sort of assets are they buying for their portfolios?

Jennifer Kenning, CEO & Co-Founder, **Align Impact**
