Producer's note

The 11th Annual PDI Europe Summit, held on May 7-8, 2024, was a resounding success, attracting over 350 attendees. Among them, 85 institutional investors engaged with leading regional fund managers and private debt experts.

As the private debt sector continues its impressive growth trajectory, Private Debt Investor's event series remains the premier platform for connecting regional allocators and global institutional investors. This forum enables participants to engage with industry thought leaders, exchange diverse insights, and uncover new opportunities in a collaborative environment.

We look forward to welcoming everybody back in 2025, where we'll continue to shape the future of private debt together.

Best,

“The main concern for investors is around the potential for overlapping exposures and the possible threat to portfolio diversification.”

What's on the minds of European investors?
Private Debt Investor

“Flexibility is important because things can change, even within the lifetime of a single asset. I think the reason that we struggle so much to define [the mid-market] is because it doesn't stop at \$25 million EBITDA - suddenly a covenant can fall off, or your yield can go up or down.”
